Question 20

Answer saved

Marked out of 5.00

Flag question

Choose the most appropriate answer.

Select one:

- 1. The valid period of the preliminary experiment is 3 days.
- 2. Though the person in charge of the experiment, he/she can stop the experiment without changing the preliminary and main experiment.
- 3. If the preliminary experiment and main experiment are both completed, the preliminary experiment is not necessary.
- 4. In case of the experiment, the administrator of animals should be consulted.

State	Finished
Completed on	Friday, 22 June 2018, 4:27 PM
Grade	85.00 out of 100.00

Question 1

Correct

Mark 5.00 out of 5.00

Flag question

Choose the appropriate one, about the endpoint of the animal experiment.

Select one:

- 1. In the experiment to measure the fatality rate, the endpoint is when the animal dies.
- 2. In the experiment to observe the condition of animals, the endpoint is when the condition of animals decreases by 20% during 3 days.
- 3. You must set the humane endpoint to do the experiment (when the animal shows signs of distress or pain).

* The passing grade is 60.
