

“Strategy for exploring metabolic pathways: Generation of hypothetical metabolic network” by Jun Ohta

Originally, this article was submitted to a special issue of Molecular BioSystems on April 1, 2009. The author received referee reports on May 15, 2009. Report A suggested that the manuscript be submitted as either a review or as an opinion paper, after improving the overall quality. Report B meant that it was worth to be published after revision. Adjudicative Report meant the author may be given the opportunity to respond but revisions need to be extensive. The original referees made conflicting recommendations and therefore an adjudicator was consulted. The author could not complete the revisions until the deadline.
