

Department of Preventive Dentistry

Create only one!

~Health promotion for all~

The *Shikata campus* has medical and dental schools as well as university hospital. The environment easily gives us great opportunities for collaborating researches, including clinical studies as below.

Mission

The mission is to develop and ensure high-level human resources of professionals in Preventive Dentistry. Our department focuses on promoting health and extending healthy life for all generation. The mission is achieved through research to identify the risk factors for oral and systemic diseases, and the social/behavioral determinants of health. Development of interventions leading to the prevention of oral diseases and promotion of population health should be established.

For patients

For Prevention

For Public health

《Our Research》*collaborating researches

Epidemiological research

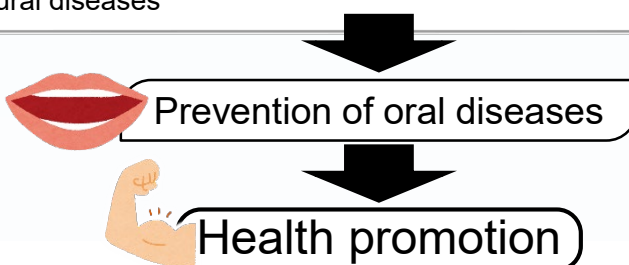

- Relationship between oral health and systemic health*
- Dental intervention controlling obesity and metabolic syndrome
- Improvement of oral status based on behavioral economics*

Clinical research

- Oral management for hospitalized patients in perioperative period*
- Relationship between oral function and frailty
