我叫鲁希琴，来自湖北荆州。大学的专业是电子信息工程。2017 年大学毕业以后，我来到了船曳老师的研究室。现在主要在研究室学习 Java 和计算机有关的知识。除了在研究室学习专业知识外，我们学校也专门为外国留学生开设了日语课程。所以在空余的时间，我还可以继续提高日语水平。我相信这对我以后的课程和研究也是非常有帮助的。我们研究室最大的特点就是外国留学生多。所以我们能经常和不同国家的人一起学习和交流不同的文化。

My name is Lu Xiqin. I came from Hube ,China and my major in my university is electric engineering. After I graduated from my university last year, I came to this laboratory. I am studying Java programming and computer in the laboratory now. At the meantime, our ok ayama university also sets Japanese courses for overseas students. So I can continue learning Japanese when I have free time. I believe it is helpful to my research and study classes. Our lab has many foreign students from different counties. So we can study and communicate different culture together. We can both use English and Japanese. I believe it is a special experience to study here.
